Working with Vectors

with Eirik

What will we cover?

This section is all about getting comfortable with vectors in NumPy.

What will we cover?

This section is all about getting comfortable with vectors in NumPy.

Content

We will learn to:

1. Create vectors in NumPy.

What will we cover?

This section is all about getting comfortable with vectors in NumPy.

Content

We will learn to:

1. Create vectors in NumPy.
2. Do basic vector operations.

What will we cover?

This section is all about getting comfortable with vectors in NumPy.

Content

We will learn to:

1. Create vectors in NumPy.
2. Do basic vector operations.
3. Understand NumPy's data types.

What will we cover?

This section is all about getting comfortable with vectors in NumPy.

Content

We will learn to:

1. Create vectors in NumPy.
2. Do basic vector operations.
3. Understand NumPy's data types.
4. Access values and perform slicing.

What will we cover?

This section is all about getting comfortable with vectors in NumPy.

Content

We will learn to:

1. Create vectors in NumPy.
2. Do basic vector operations.
3. Understand NumPy's data types.
4. Access values and perform slicing.
5. Understand difference between copies and views.

This section is all about getting comfortable with vectors in NumPy.

Content

We will learn to:

1. Create vectors in NumPy.
2. Do basic vector operations.
3. Understand NumPy's data types.
4. Access values and perform slicing.
5. Understand difference between copies and views.

Exercise Set

In the exercise set for this section, we will work with temperature data.
