Making and Modifying Matrices

with Stine

What will we cover?

This section is all about making and modifying matrices.

What will we cover?

This section is all about making and modifying matrices.

Content

We will learn to:

1. Create 2D-arrays.

What will we cover?

This section is all about making and modifying matrices.

Content

We will learn to:

1. Create 2D-arrays.
2. Handle attributes of matrices.

What will we cover?

This section is all about making and modifying matrices.

Content

We will learn to:
1. Create 2D-arrays.
2. Handle attributes of matrices.
3. Specify an axis in aggregate functions.

What will we cover?

This section is all about making and modifying matrices.

Content

We will learn to:

1. Create 2D-arrays.
2. Handle attributes of matrices.
3. Specify an axis in aggregate functions.
4. Handle Boolean matrices.

What will we cover?

This section is all about making and modifying matrices.

Content

We will learn to:

1. Create 2D-arrays.
2. Handle attributes of matrices.
3. Specify an axis in aggregate functions.
4. Handle Boolean matrices.
5. Work with missing values.

What will we cover?

This section is all about making and modifying matrices.

Content

We will learn to:

1. Create 2D-arrays.
2. Handle attributes of matrices.
3. Specify an axis in aggregate functions.
4. Handle Boolean matrices.
5. Work with missing values.

Exercise Set

The exercise set will work with weather data from Berlin saved as a 2D-array.
