Broadcasing and Advanced Indexing

with Eirik

What will we cover?

This section is all about understanding broadcasting and advanced indexing in NumPy.

What will we cover?

This section is all about understanding broadcasting and advanced indexing in NumPy.

Content

We will learn to:

1. Become comfortable with basic broadcasting.

What will we cover?

This section is all about understanding broadcasting and advanced indexing in NumPy.

Content

We will learn to:

1. Become comfortable with basic broadcasting.
2. Understand NumPy's rules for how broadcasting is handled.

What will we cover?

This section is all about understanding broadcasting and advanced indexing in NumPy.

Content

We will learn to:

1. Become comfortable with basic broadcasting.
2. Understand NumPy's rules for how broadcasting is handled.
3. Slice 2D-arrays.

What will we cover?

This section is all about understanding broadcasting and advanced indexing in NumPy.

Content

We will learn to:

1. Become comfortable with basic broadcasting.
2. Understand NumPy's rules for how broadcasting is handled.
3. Slice 2D-arrays.
4. Index by using lists.

What will we cover?

This section is all about understanding broadcasting and advanced indexing in NumPy.

Content

We will learn to:

1. Become comfortable with basic broadcasting.
2. Understand NumPy's rules for how broadcasting is handled.
3. Slice 2D-arrays.
4. Index by using lists.
5. Understand how Boolean indexing works.
